

# User Manual – powder

## First refuelling:

1. Check how much the tank holds in total.
2. Fill in the number of deciliters according to the quick reference guide below.
3. Fill up with a full tank.  
*(This is so that the whole first tank will have the right concentration.)*

## For further refuelling:

1. Refuel and check how many litres have been refuelled.
2. Fill deciliters according to the quick reference guide below.
3. Make sure that the powder does not stick to the pipe to the tank.

## DOSAGE TABLE: 1 sachet = 6.5 dl
